

Merger and acquisition opportunities arise quickly.

DatasiteOne is built for rapid, secure implementation no matter the size or complexity of the deal and content requirements.

Upload and Organize Documents

Simple, intuitive uploading and document organization allows you to spend more time on high-value tasks.

- Drag-and-drop controls to organize your data room
- Upload up to 50GB zip files, retaining the folder structure
- Publish Now / Publish Later controls
- Bulk Renaming tools
- Optical Character Recognition (OCR) in 11 languages

Setting File Room, Folder and Document Access

Make sure you have the right documents in the right hands with clear, simple access controls and document settings.

- Role-based security access controls
- Document permission settings for native file, custom watermark and IRM download

Security

Merrill adheres to the strictest global security standards across the data security chain.

- ISO 27001 certified
- SSAE16 SOC 2 Type II attestation
- EU-US Privacy Shield certified
- GDPR compliant
- In-transit data secured via TLS 1.2 protocol
- At-rest data secured with AES 256-bit encryption

Due Diligence Document Review

Easy viewing, simple security and lightning-fast search across languages for cross-border deals speeds document review.

- Secure document viewer with customizable watermarking
- Native Microsoft Excel® viewer with tiled watermarking

Invitation Management

Adding users and managing their access is simple with in-app tools.

- 14 invitation languages
- Single click to Activate, Deactivate or Withdraw invitation controls
- Customizable project disclaimer

Service and Support

Always-on, omni-channel support. Merrill's dedicated team of proven subject matter experts are well-versed in a wide variety of deal types.

- 24/7/365
- Deep industry sector and deal expertise
- 15 languages spoken
- Online help community
- Calls answered in 3 rings or less

24/7/365

Dashboard and Visual Analytics

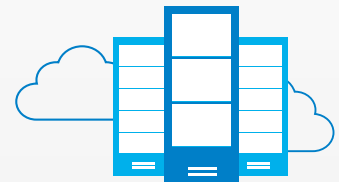

Precise reporting and analytic tools enable essential data room insight, significantly decreasing time to key strategic decisions.

- The DatasiteOne dashboard presents a dynamic, at a glance view of the most relevant KPIs
- Project Index reporting displays real-time permission levels
- Document, user and role activity monitoring
- Data room permission and content history

Platform

DatasiteOne is a modern multi-tenant web application using microservices and containers running on Pivotal Cloud Foundry hosted in Microsoft Azure. This architecture delivers high performance, scalability, and cutting edge security, monitoring and management tools.

Q&A

Managing Q&A for the Project Manager is simple and intuitive.

- Setup Wizard to establish teams, create question categories, set question limits and approval workflows
